

GDPR – Is your Business Ready?

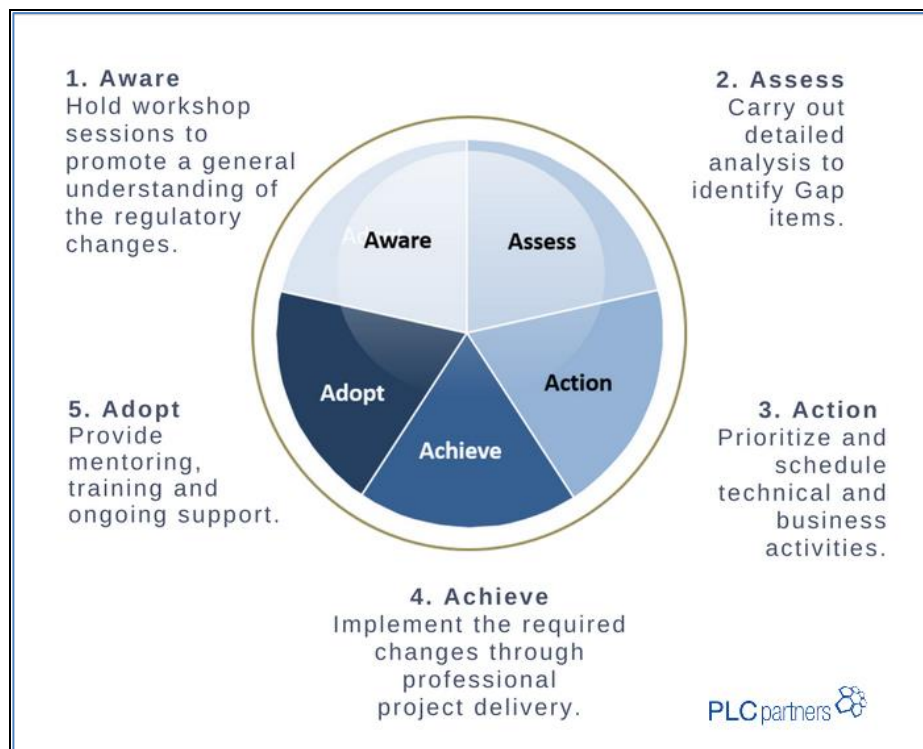

GDPR comes into effect on May 25th, 2018

If you collect, share or use personal data then you are affected.

The General Data Protection Regulation is an EU directive that governs the collection, use and storage of personal data concerning EU citizens by organisations. It imposes a much tougher data protection regulatory framework on Europe and the wider world for the processing of personal data. It applies to all organisations regardless of size that hold or process personal information about their employees, suppliers or customers. It is intended to protect & harmonise the individual's rights and access to their personal data.

We can assist your Business become GDPR ready.

Organisations are required to demonstrate the ways in which they comply with data protection principles when transacting business. PLC Partners has developed a structured 5-step Approach to guide and support you through the GDPR compliancy process.

Project Life Cycle Partners is an independent technology consulting firm specialising in end-to-end Program and Change Management. Established in 2004, our highly experienced consultants tailor a solution based on your unique requirements and provide the methodology and tools you need throughout the process.
